

LENZ Charging Solutions Powers EV Test Track at San Diego International Auto Show

Irvine, California – December 23, 2024 – LENZ Charging Solutions is thrilled to announce its role as the official charging partner for the San Diego International Auto Show (SDIAS), powering the EV Test Track and Electric Avenue for this year’s event. From December 28, 2024, through January 1, 2025, LENZ will provide state-of-the-art charging solutions for the EVs featured in the show’s interactive exhibits, ensuring a seamless experience for attendees eager to test drive the latest in electric vehicle technology.

“Our partnership with SDIAS makes perfect sense,” said Rich Shen, founder and CEO of LENZ Charging Solutions. “This is one of the largest auto shows in California, located in one of the top EV markets in the nation. California alone accounts for nearly half of all EVs sold in the U.S., and San Diego is at the forefront of this transformation. Being part of this event allows us to showcase our leadership in EV charging solutions while helping attendees demystify EV ownership and explore the exciting possibilities of going electric.”

At SDIAS, LENZ will utilize its soon-to-be-released Mobile Charging Unit, along with its trusted Wall-Mounted EVSE, to power all vehicles on the EV Test Track and along Electric Avenue. Attendees will have the opportunity to experience firsthand how LENZ charging solutions integrate with various electric vehicle brands and models.

Though LENZ will not have a booth presence at the show, those interested in their cutting-edge products and services can visit www.LenzCharging.com for more details. LENZ will also host daily giveaways at the event, and attendees are encouraged to visit [HERE](#) to participate on-site.

About LENZ Charging Solutions

LENZ Charging Solutions, based in Irvine, CA, is a market leader in providing innovative and reliable EV charging solutions for home and commercial use. From charging adapters to advanced EVSE systems, LENZ has built a reputation for quality, safety, and customer service. As a proud partner of SDIAS, LENZ Charging Solutions is committed to supporting the rapid adoption of electric vehicles, ensuring EV drivers have access to safe, efficient, and reliable charging solutions.
